Piedmont Board of Education

Hari Titan

Ph.D with professional experience to offer the district responsible financial and academic oversight

My advanced analytical expertise, patience and persistence paid off. For example, I found and raised as issues:

We're paying full-day teacher salaries but don't have all-day kindergarten due to a shortage of classrooms.

Students are doing very well in most subjects however STEM rankings could be better with additional funding.

Taxpayers could have saved \$40 Million in bond interest charges for rebuilding Havens had we tried to avoid creative financing.

Building from scratch allows for better designs & curb appeal at almost the same cost as a complete renovation.

For more details check out in-depth articles on these topics and more on my website. I have a passion for making the schools the best they can be, dedication to doing this research and giving back to the community.

Objective. Diligent. Fiscally responsible.
